Target: Data Analyst / ETL / BI (Aerospace)

Summary: Aerospace Engineering (B.Sc.) candidate (expected 09–10/2026) with data experience in Airbus: ETL pipelines, product-structure analytics, and dashboards to support engineering queries and change impact decisions.

Experience

Consultant (embedded at Airbus) — Eurodrone program

Aug 2023 – Sep 2025

Getafe (Madrid)

- Supported CM/change-process activities with emphasis on documentation readiness and traceability.
- Customer-side contributor for a 3DEXPERIENCE rollout: requirements clarification and UAT feedback loops.
- Primary UAT stakeholders for One Platform were Configuration Management and Systems Engineering.
- Delivered enablement at scale: ~32 sessions; ~150 users trained.

Formula Student — University Team

Sep 2020 – Dec 2023

- CAD/Configuration Lead: coordinated assemblies, design reviews, drawings, and structured product organization.
- Vehicle Dynamics team member: conceptual design of driverless brake and steering actuators (force sizing, system architecture, supplier catalog research), brake redesign, manufacturing, and track/testing support.

Data Intern (Airbus Commercial) — Skywise (Palantir suite)

Feb 2023 – Aug 2023

- Built ETL pipelines (SQL/Python) in Skywise (Palantir suite) to clean and transform legacy configuration/product-structure data.
- Delivered a product-structure/BOM lookup dashboard and a lightweight in-platform query interface in Skywise.

Education

B.Sc. Aerospace Engineering (UPM) — Propulsion track

Expected Sep–Oct 2026

Additional training: LSE Summer Intensive (1 month) — Introduction to Data Science (R/SQL)

Skills

ETL; SQL; Python (pandas); Jupyter; Dashboards/visualization; Data quality; Skywise; R (basics); Git; Linux

Languages

Spanish (native); English (C2 – Cambridge Proficiency); French (~B1)

Selected Extras

High-performance hockey: national team selections.
