Madrid, Spain | +34 608 540 496 | pgzarandieta@hotmail.com | LinkedIn

Target: Mechanical Engineer / CAD & Prototyping

Summary: Aerospace Engineering (B.Sc.) candidate (expected 09–10/2026) with hands-on mechanical experience in Formula Student: CAD coordination, manufacturing support, testing/track work, and design reviews.

Experience

Consultant (embedded at Airbus) — Eurodrone program

Aug 2023 – Sep 2025

Getafe (Madrid)

- Worked in a high-rigor PLM/CM environment supporting change process and traceability.
- Customer-side contributor for a 3DEXPERIENCE rollout: requirements, acceptance criteria, and UAT feedback.
- Primary UAT stakeholders for One Platform were Configuration Management and Systems Engineering.

Formula Student — University Team

Sep 2020 – Dec 2023

- CAD & Configuration Lead: managed assemblies, design reviews, drawings, and structured product organization.
- Vehicle Dynamics team member: conceptual design of driverless brake and steering actuators (force sizing, system architecture, supplier catalog research), brake redesign, and manufacturing (welding, lathe, milling).
- Track operations/testing: pre/post checklists, suspension setup tuning, and test-session analysis.
- Competition support: technical inspection, design defense, and cost defense.

Education

B.Sc. Aerospace Engineering (UPM) — Propulsion track

Expected Sep–Oct 2026

Additional training: LSE Summer Intensive (1 month) — Introduction to Data Science (R/SQL)

Skills

Parametric CAD; Assemblies; Design reviews; 3DEXPERIENCE/CATIA; FEA basics; Topology optimization; Manufacturing (welding/lathe/mill); 3D printing; MATLAB

Languages

Spanish (native); English (C2 – Cambridge Proficiency); French (~B1)

Selected Extras

High-performance hockey: national team selections.
